Academic system at Career Point University is built around experimental learning where the students are motivated to understand conceptual framework and apply them.

Career Point follows the world's best IIT education system to support every student to realize their potential with an experiential approach in the academics. The academic system of Career Point University is students centric giving students an opportunity to participate to enhance their knowledge, skills and understanding in multi-disciplinary environment through practical experience to ensure that knowledge imparted to student works to build a strong career.

Key aspects of CPU academic system are

The academic system of CPU is just not limited to course curriculum but also to inculcate various skills which are essential for student to become professional and leaders of tomorrow.

TEACHING AND LEARNING - *Knowledge that Works*

Students learn best when they are actively participating, whether that be through focused listening, discussion, problem solving or explaining to others. The teaching and learning at CPU encourages critical thinking and analysis.

We pride ourselves on the quality of the education we provide. All subjects are taught by experts as per the latest industry requirements, ensuring that outdated techniques are eliminated from the course content. Practical skills are a vital part of any course, and it is important that the laboratory and project work should integrate well with the taught courses. As such, not only laboratory experience but also individual and team project work are given a high priority during the teaching and learning at CPU.

All the courses at CPU are designed as per the needs of industry to ensure you acquire the skills and knowledge necessary in your chosen career.

FACULTY - *Brightest Mind to Mentor the Best Brain*

To ensure high quality of teaching, our leadership team has handpicked teaching staff; majority of them are from premier institutions having distinguished academic achievements to their credit and are actively involved in teaching, research and consultancy.

We also have pool of experts from industry, business, government and research institution to ensure mix of real world experience and academia. The CPU faculty and staff work together to provide an outstanding learning environment for our students.

One-on-One Mentor-ship

To monitor the performance of the student, each student is assigned one faculty member as a mentor. Mentor records the profile of student with regards to academic performance and participation in extra-curricular activities. Mentor help students build a set of curricular & extracurricular experiences that align with their interests and goals. Students can contact their mentor for any academic or non-academic issue during the session for the solution.

Mr. Nitin Gadkari, Minister of Road Transport & Highways, Govt. of India addressing at CP Auditorium

Glimpses of Experiential Learning at CPU

Technique of farming without soil

Agriculture Students have demonstrated hydroponic technique of farming that doesn't require soil for growth of plants. In this technique plants get their nutrition only through water. 8 to 10 plants are placed in a series in cylindrical pots and water is passed through a motor & all the minerals of soil are mixed in water in liquid form.

Students Spreading Wings with their Mentors Authored Books:

1. **Effect of Mango Shell and Nut Shell Ash as Pavement Material (ISBN 978-3-330-03578-2)** – by Tiza Toryila Michael, M.Tech Student and Er. Sitesh Kumar Singh, Assoc. Professor
2. **Comparison of Flexural Strength Values of Palm Kernel Concrete** – by Tiza Toryila Michael, Obam S. Ogah & Ukpung U. Emmanuel, M.Tech students

Sofa using scrape Tyres:

Students of Mechanical Engineering have prepared a luxury sofa from scrap tyres. Three students took four days to prepare this three seater used 10 tires, plywood, sponges and nut-bolts in this sofa. Student Tushar Sen said that the weight of the prepared sofa is about 200 kg. the cost of sofa is also about 50% less than the market price.

Low Cost Hybrid Multi-Tasking Vehicle by Mechanical Branch students

A group of final year Mechanical Engineering students have developed a hybrid and economic transport vehicle which is beneficial to farmers and traders of small towns and villages. The engine is capable of generating a maximum transmitting power of 10 BHP and it can operate on battery or petrol. The fuel efficiency is 45 km per liter and it can carry a maximum load of 2 tonnes.

Go Kart for Elite Karting Championship 2017:

Students from Mechanical and Electrical branch jointly developed Go- Kart for Elite Karting Championship 2017 held at Bhopal. This was an international level Go-Karting event for all technical students. Due to their innovative ideas, excellent design and meticulous execution with set technical specifications; CPU students achieved 6th position among more than 100 teams in finale.

Steam Power Plant: This model utilizes the waste pine needle based briquettes for initial steam generation. The high pressure steam then rotates the pelton wheel. The energy thus generated is converted to electricity.

Bogie Mechanism: The model was developed as simulation for multi-purpose use in daily life. The design has no springs or stub axles for each wheel, allowing the bogie to climb over the obstacles. This mechanism is suitable for carrying items in shopping malls; one can find a separate place for carrying kids. This mechanism maintains the chassis in a balanced position, and avoids shocks even on an irregular surface.

Electricity Generation from Swing: Mechanical Engineering, B. Tech students conceived and developed innovative idea of generating electricity from the swing.
